Re: Certification of Compliance with State Lifeline/Link Up Procedures

This letter is to certify to the Michigan Public Service Commission ("MPSC") that Chippewa County Telephone Company is in compliance with the certification, verification, and recordkeeping procedures for Lifeline/Link Up programs in Michigan adopted by the MPSC in Case No. U-14535 on June 7, 2005, and Section 316 of the Michigan Telecommunications Act ("MTA"), as amended on November 22, 2005. Further, our company and its Lifeline administrator also adopted and implemented consistent state procedures.

I certify that our company is in compliance with the certification, verification, and recordkeeping procedures set forth in Case No. U-14535 and Section 316 of the MTA; that our company complies with state certification procedures to document consumer income-based eligibility for Lifeline or that the person participates in one of the designated federal assistance programs, prior to that consumer's enrollment; that our company complies with state verification procedures to validate consumers' continued eligibility for Lifeline; and that our company complies with state recordkeeping procedures for documenting compliance with all state requirements regarding the Lifeline/Link Up program.

In accordance with the state program and procedures, I am an officer of the company and I am submitting this certification attesting that our company is in compliance with the state certification, verification, and recordkeeping procedures, and that to the best of my knowledge, documentation of income was presented.

Yours truly,

James P. Brogan III
President
